

IF YOU ARE GOING TO INSPECT IT...
"DO IT RIGHT"

HOW MANY RESTAURANTS CAN YOU AFFORD TO OWN? PRE-ENGINEERED MULTI RESTAURANT SUPPRESSION SEMINAR

In our experience and discussions with other Fire Protection Distributors and Fire Inspector's, we found a number of systems that are not properly installed, inspected and maintained, which has prompted Flame-Tamer to develop a Multi Systems Seminar course for technicians in Canada.

Flame Tamer's seminar covers specific areas of the NFPA 17A and 96 pertaining to the inspection, service and maintenance of all restaurant fire suppression systems. Flame-Tamer's goal is to accomplish the above in a two (2) day seminar as well as the practical portion on inspections and maintenance on various systems. It is your responsibility to have the current manuals for the systems you are inspecting. They are available as per UL300-ULC/1254.6. Please contact the manufacturer for a copy.

There will be detailed visual and audio presentation on the systems on display, insuring the technician's confidence. We will also cover systems that don't meet UL/ULC listings, and the necessary tools required to properly service and maintain the Fire Suppression Systems, along with money making tips.

At the conclusion of the multi system seminar there will be a exam. This exam will cover a clear understanding of the applicable NFPA standards, as well as the ability to perform the maintenance and inspection. The passing grade is 100%.

A certificate will be issued upon the successful completion of a written exam along with the practical portion.
