Fire Extinguisher Certification Course

Why is this training so important to you?
Training your employees ensures compliance with NFPA standards and provides validation.
Also, to your customers it represents a level of professionalism of your company.

BE PROACTIVE!

Set the standard for your competition!

Training is a requirement in some provinces in Canada already, NFPA has recently made changes to NFPA 10 - 2022 section 7.1.2.1 that states “persons performing maintenance and recharge of extinguishers shall be certified.”

The NFPA-10 Course is broken into three sections.

NFPA-10:

This portion of the course will lead the technicians through the chapters and Annexes of the NFPA-10 booklet. They will be asked industry related questions and guided through NFPA-10 to find the appropriate answers.

Extinguishers:

During the extinguisher portion of the course, technicians will be shown proper inspection of an extinguisher. This will be shown through power point presentation. As well as, an Extinguisher “cut-away” to expose the inner working, which will assist in the understanding of how the recharging proce-dures operate.

At an added cost, additional training can be provided at our facility for those that require a more hands on approach such as new employees.

Testing:

After Completion of the training portion of the course, technicians will be given a multiple choice test requiring 100% proficiency. You will require a copy of the NFPA 10 - 2026
If you do not have a copy, you can purchase one from us and have it shipped to you prior to the training date.

At Flame-Tamer we believe a wrong answer is an opportunity for greater understanding, which can lead to an increase in your profits.

Flame Tamer

Canadian Owned Company

FLAME TAMER

"Fire Extinguisher Certification Course"

Date:	**Start Time:**	**Locations**:
Tuesday December 15, 2026	8:30 a.m. E.S.T. (until approx 4:30pm)	**Zoom** Meet
